

Perfect Solutions for the Glass Industry

MorganAM&T[™]
...Continuous Confidence

Optimum Grade Selection Characteristics

The glass industry is a major sector that touches many areas of our everyday life construction, lighting and containers. Glass has a performance depending on the exacting manufacturing processing parameters which need to be maintained at all time. Morgan AM&T make a vital contribution to glass manufacturing

Float Glass

- Exceptional corrosion resistance
- Minimal wettability
- High levels of thermal and mechanical integrity required for these environments
- Key components in float-glass systems for the continuous manufacture of large format plate glass are made using specialty graphite components supplied by Morgan AM&T

Glass to metal sealing jigs and bottle glass handling

Precision machined graphite components for the most demanding applications in glass forming and handling.
